</table>

If a CLE course is double-counted to satisfy two different CLE areas, a free elective(s) must be taken to maintain a minimum of 132 credits.

**Electives:** BSE majors must take 12 hours of BSE electives, 6 hours of chemistry electives, 6 hours of engineering topics electives, and 8 hours of technical electives. Students choose from the courses listed under each respective requirement, noting that some courses are not available to all students because some courses have prerequisites and some are restricted to majors in the offering department. Courses with substantial duplication of courses previously taken will not qualify for credit. Independent study (XXX 4974) and undergraduate research (XXX 4994) courses cannot be used as electives.

**Change of Major Requirements:** Please see http://enge.vt.edu/undergraduate-changing-majors.html

**Foreign Language Requirements:** Students must have had 2 years of a foreign language in high school or one year at the college level (6 credit hours) of the same language. College-level credits used to meet this requirement do not count towards the degree.

**Satisfactory Progress Towards Degree:** University Policy 91 outlines university-wide minimum criteria to determine if students are making satisfactory progress towards the completion of their degrees. The BSE Department fully supports this policy. Specific expectations for satisfactory progress for BSE majors are as follows:

- Each student must meet the minimum University-wide criteria as described in Policy 91 and summarized in the Undergraduate Catalog (under Academic Policies);
- Maintain overall and in-major GPAs of at least 2.0 (in-major GPA based on grades in required BSE courses and BSE electives);
- Be registered for at least one BSE-prefix course per semester, excluding BSE 2094, 2294, 2484, and 4994;
- Not take any BSE course required in the major more than twice, including attempts ending in course withdrawal; and,
- Having attempted 72 hours (including transfer, advanced placement, advanced standing, and credit by examination), passing MATH 2204 and ESM 2304.

**Prerequisites:** Pre-requisites for each course are listed after the course title.

- There are no hidden prerequisites in this program of study.
- Prerequisites may change from what is indicated. Be sure to consult the University Catalog or check with your advisor for the most current requirements.

**Graduation Requirements:** Students must pass all required courses and both the in-major and overall GPA must be at least 2.0 for graduation. A student must obtain a C or better in all BSE courses, which all count towards the in-major GPA, including the required BSE courses (2004, 3134, 3144, 3154, 3504, 4125, 4126, and 4204), the 12 hours of required BSE electives, and any additional BSE electives, if taken. Only free electives and courses only offered on a Pass/Fail basis may be taken Pass/Fail. Courses on the College of Engineering list of non-degree credit may not be taken for credit towards graduation (list found at www.eng.vt.edu/forms).
Biological Systems Engineering
Electives
2018 Checksheet

Courses with substantial duplication of courses taken previously will not qualify for credit. Independent study (XXX 4974) and undergraduate research (XXX 4994) courses cannot be used as electives.

Choose from the courses listed under each respective requirement, noting that some courses are not available to all students because some courses have prerequisites and some are restricted to majors in the offering department.

**Biological Systems Engineering (BSE) Electives (12 credit hours required):**

- BSE 2304 Landscape Measurement and Modeling
- BSE 3334 Small Watershed Hydrology
- BSE 3334 NPS Pollution Assessment and Control
- BSE 3524 Unit Operations in BSE
- BSE 3534 Bioprocess Engineering
- BSE 4224 Field Methods in Hydrology
- BSE 4304 NPS Pollution Modeling and Management
- BSE 4304 Geographic Information Systems for Engineers
- BSE 4524 Biological Process Plant Design
- BSE 4544 Protein Separation Engineering
- BSE 4564 Metabolic Engineering
- BSE 4604 Food Process Engineering

**Chemistry (CHEM) Electives (6 credit hours required):**

- BCHM 2024 Concepts of Biochemistry
- CHEM 2114 Analytical Chemistry
- CHEM 2114 Analytical Chemistry Lab
- CHEM 2514 Survey of Organic Chemistry
- CHEM 2535-2536 Organic Chemistry
- CHEM 2565-2566 Principles of Organic Chemistry
- CHEM 3615 Physical Chemistry
- CHEM 4615 Physical Chemistry for the Life Sciences
- CSES 4314 Water Quality
- CSES 4324 Water Quality Laboratory
- CSES 4734 Environmental Soil Chemistry
- GEOG 4634 Environmental Geochemistry

**Engineering Topics Electives (6 credit hours required – students must request to be force-added to major-restricted courses):**

All courses listed as Biological Systems Engineering electives

- BMES 2104 Intro to Biomedical Engineering
- CEE 3104 Intro to Environmental Engineering*
- CEE 4114 Fundamentals of Public Health Engineering*
- CEE 4134 Engineering Solutions for Environmental Sustainability*
- CEE 4144 Air Resources Engineering*
- CEE 4154 Indoor Environmental Quality and Sustainable Facilities*
- CEE 4174 Solid and Hazardous Waste Management*
- CEE 4254 Municipal Engineering*
- CEE 4264 Sustainable Land Development*
- CEE 4314 Groundwater Resources*
- CEE 4314 Open Channel Flow*
- CEE 4334 Hydraulic Structures*
- CEE 4344 Water Resources Planning*
- ECE 3054 Electrical Theory
- ECE 4194 Engineering Principles of Remote Sensing
- ECE 4364 Alternate Energy Systems
- ENGR 2514 Intro to Engineering Computation and Control with Labview
- ESM 2204 Mechanics of Deformable Bodies
- ENGR 3124 Intro to Green Engineering
- ENGR 4134 Environmental Life Cycle Assessment
- ESM 3054/MSE 3054 Mechanical Behavior of Materials
- ESM 3064/MSE 3064 Mechanical Behavior of Materials
- ESM 4044 Mechanics of Composite Materials
- ESM 4105-4106 Engineering Analysis of Physiologic Systems
- ESM 4114 Nonlinear Dynamics and Chaos
- ESM 4204 Musculoskeletal Biomechanics
- ISE 2254 Manufacturing Processes
- ISE 2254 Manufacturing Processes Lab
- ISE 2404 Deterministic Operations Research I
- ISE 4654 Principles of Industrial Hygiene
- ISE 4615 Management Systems Theory, Applications, and Design
- MSE 2034 Elements of Materials Engineering
- MSE 2044 Fundamentals of Materials Engineering
- MSE 2054 Fundamentals of Materials Science
- MSE 3304 Physical Metallurgy
- MSE 4574 Biomaterials
- MSE 4584 Biomimetic Materials
- MSE 4604 Composite Materials

*CEE courses are major-restricted at course request, but will be made available for non-CEE majors three days after the opening of drop/add.
Technical Electives (18 credit hours required — students must request to be force-added to major-restricted courses):

- All courses listed as Chemistry or Engineering Topics Electives, except 4754, 4964, 4974, 4984, 4994 in any department.
- All BIOL 3XXX laboratories and all 2000, 3000, and 4000 level courses, except 3504.
- CHEM 1046 General Chemistry Lab and all CHEM 2000, 3000, and 4000 level courses except 4014.
- All MATH 3000 and 4000 level courses except 4044, 4025, 4026, 4044, 4054, 4064, 4754, 4964, 4974, 4984, 4994
